

## INVEST-HOTEL – an idea for hotel textiles

Poland's largest comprehensive and modern show – this defines the Trade Fair of Equipment for Hotels INVEST-HOTEL 2008 held on 16-18 October. As always, a significant part of the trade fair exhibition will be devoted to textile producers and distributors who will present the latest trends in design of hotel interiors.

Textiles in hotels are used not only to cover surfaces with a decorative fabric. They also create a refined visual effect that adds to the style and character of the interiors. Textiles used in public facilities have to meet additional criteria, such as flame resistance, high quality and durability, protection against germs and removal of odours. **INVEST-HOTEL 2008** is an excellent opportunity to present modern hotel textiles and technological developments in textiles, including **hotel bed linen** and **sheets, carpets, floor carpeting, curtains, net curtains, table cloths, towels, nightgowns, bathroom carpets, bed spreads, roller-blinds**, and any other **textiles** adjusted to specific conditions of use in hotels.

The Poznań-based hotel show, unlike any other show of this type in Poland, is dedicated to the development of hotel infrastructure, improvement of hotel services and promotion of good design. **INVEST-HOTEL** is a place for business meetings, for establishing domestic and international contacts with business clients and an opportunity to expand the existing group of business partners and to set terms for future cooperation face to face. Well prepared exhibition areas, professional services and a rich programme of events create an additional incentive for exhibitors to participate in this unique event. This is why you shouldn't wait to plan your visit to **INVEST-HOTEL**.
